Canadian Community Health Survey, 2012: Annual Component (CCHS 2012: Annual Component)

Overview	
Type	Canadian Community Health Survey
Identification	cchs-82M0013-E-2012-Annual-component
Series	<p>The Canadian Community Health Survey (CCHS) is a cross-sectional survey that collects information related to health status, health care utilization and health determinants for the Canadian population. The survey's objectives were to:</p> <ul style="list-style-type: none"> - support health surveillance programs by providing health data at the national, provincial and intra-provincial levels; - provide a single data source for health research on small populations and rare characteristics; - timely release of information easily accessible to a diverse community of users; and - create a flexible survey instrument that includes a rapid response option to address emerging issues related to the health of the population.
<p>Abstract</p> <p>The Canadian Community Health Survey (CCHS) is a cross-sectional survey that collects information related to health status, health care utilization and health determinants for the Canadian population. It surveys a large sample of respondents and is designed to provide reliable estimates at the health region level. In 2007, major changes were made to the CCHS design. Data is now collected on an ongoing basis with annual releases, rather than every two years as was the case prior to 2007. The survey's objectives were also revised and are as follows:</p> <ul style="list-style-type: none"> • support health surveillance programs by providing health data at the national, provincial and intra-provincial levels; • provide a single data source for health research on small populations and rare characteristics; • timely release of information easily accessible to a diverse community of users; and • create a flexible survey instrument that includes a rapid response option to address emerging issues related to the health of the population. <p>The CCHS data is always collected from persons aged 12 and over living in private dwellings in the 115 health regions covering all provinces and territories. Excluded from the sampling frame are individuals living on Indian Reserves and on Crown Lands, institutional residents, full-time members of the Canadian Forces, and residents of certain remote regions. The CCHS covers approximately 98% of the Canadian population aged 12 and over.</p> <p>The CCHS produces three types of microdata files: master files; share files; and public use microdata files (PUMF). The characteristics of each of these files are presented in the User Guide. The PUMF is released every two years and contains two years of data.</p>	
Kind of Data	Survey Data
Unit of Analysis	Individuals

Scope & Coverage	
Keywords	Alcohol, Cancer, Chronic Conditions, Depression, Diabetes, Driving, Drug use, Education, Food Security, Health Care, Health Professionals, Income, Labour Force, Mental Health, Smoking, Stressors

Information	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]			
Statistics [NW/ W]	[Valid=59070 / 28320190.81] [Invalid=2637 / 1170839.16]			
Universe	Respondents aged 14 and over.			
Literal question	Do you have arthritis, excluding fibromyalgia?			

# CCC_051: Has arthritis				
Notes		In the 2011 French questionnaire, the word "arthrose" was added to the arthritis question as patients tend to associate the word "arthrite" with rheumatoid arthritis and "arthrose" with degenerative arthritis. However, the word "arthrose" was omitted from the question in 2012. As a result, the arthritis estimates for the province of Quebec and subsequently the Canada level were affected. The data for the arthritis indicator in 2011 should be used with caution

# MEXDEBF2: Length of exclusive breastfeeding (D)				
Information		[Type= discrete] [Format=numeric] [Range= 0-8] [Missing=*]		
Statistics [NW/ W]		[Valid=2932 / 1460748.57] [Invalid=58775 / 28030281.4]		
Universe		Respondents who answered MEX_03 = (2, 7 or 8) or MEX_05 = (2, 7 or 8) or MEX_07 < 13 or MEX_07 = (97 or 98) or MEX_01 = (7 or 8)		
Notes		Based on MEX_03, MEX_06, MEX_07. This variable is an update of MEXDEBF. It includes more categories, covers the 6 month period in a single category, and takes into account conflicting information provided in MEX_06 and MEX_07. Respondents who had not given birth in the past 5 years or who were less than 15 years old or more than 55 years old are		

# MEXDEBF2: Length of exclusive breastfeeding (D)				
		excluded from the population. Since the variable is used to measure only the final duration of exclusive breastfeeding, mothers who will breastfed and who had not yet added any other liquid or solid foods to the baby's feeds are also excluded.

# MEXFEB6: Exclus. breastfeed for at least 6 months				
Information	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]			
Statistics [NW/ W]	[Valid=2932 / 1460748.57] [Invalid=58775 / 28030281.4]			
Universe	Respondents who answered MEX_03 = (2, 7 or 8) or MEX_05 = (2, 7 or 8) or MEX_07 < 13 or MEX_07 = (97 or 98) or MEX_01 = (7 or 8)			
Notes	<p>In 2011, MEX_07 was split into two questions: MEX_06B and MEX_08A; therefore, this variable needed to be updated accordingly.</p> <p>Health Canada recommends exclusive breastfeeding for a period of up to 6 months. This variable indicates the number of mothers who followed this recommendation. Respondents who had not given birth in the past 5 years or who were less than 15 years old or more than 55 years old are excluded from the population. Since the variable is used to measure only the final duration of exclusive breastfeeding, mothers who still breastfed and who had not yet added any other liquid or solid foods to the baby's feeds are also excluded.</p>

# SDCDFOLS: First official language spoken - (D)				
Information	[Type= discrete] [Format=numeric] [Range= 1-4] [Missing=*]			
Statistics [NW/ W]	[Valid=60047 / 28701769.42] [Invalid=1660 / 789260.55]			
Notes	For the censuses, this variable was derived within the framework of the application of the Official Languages Act. The same method for deriving the variable was applied here.			

# SDCDFOLS: First official language spoken - (D)				
		<p>This derivation method is described in the regulations concerning the use of official languages for the provision of public services. It takes into account first the knowledge of the two official languages, second the mother tongue, and third the home language. People who can conduct a conversation in French only are assigned French as their first official language spoken. People who can carry on a conversation in English only are assigned English as their first official language spoken. The responses to questions on mother tongue and home language are subsequently used to establish the first official language spoken by people who speak both English and French, or who cannot speak either of the two official languages. The French category includes people who have French only or French and at least one non-official language as their mother tongue. People who have English only or English and at least one non-official language as their mother tongue are included in the English category. For cases that have not yet been classified, people are assigned to the French category when they speak French only or French and at least one non-official language as their home language. The procedure is the same for English. Thus, the population is classified into two principal categories: English or French. It is necessary to add two residual categories for people who cannot be classified in accordance with the information available: English and French and neither English nor French.</p> <p>Please consult the following documents for more information: Regulations respecting communications with and services to the public in either official language, registered on December 16, 1991, in accordance with section 85 of the Official Languages Act, R.S.C., c. 32 (4th suppl.) and Population Estimates by First Official Language Spoken, 1991, Catalogue no. 94-320, Demography Division, Statistics Canada.</p>

# EDUDH04: Highest level/edu. - HH 4 levels - (D)				
Information	[Type= discrete] [Format=numeric] [Range= 1-4] [Missing=*]			
Statistics [NW/ W]	[Valid=56791 / 26841063.02] [Invalid=4916 / 2649966.95]			
Notes	This variable is derived by temporarily creating EDUDR04 for each member of the household (all PERSONID within SAMPLEID). The highest value is then obtained by comparing values of EDUDR04 for all members within the household. If any PERSONID has EDUDR04 of NS (not stated) then NS is returned. If all of EDUDR04 are NA (not applicable) then NA is returned.

# FSCDHFS2: Household Food Security Status (HC)				
Information	[Type= discrete] [Format=numeric] [Range= 0-2] [Missing=*]			
Statistics [NW/ W]	[Valid=59428 / 28403211.41] [Invalid=2279 / 1087818.56]			
Notes	<p>When using the person weight (WTS_M), this variable reflects the number of people living the household with food insecurity. When using the household weight (WTS_MHH), this variable reflects the number of households with food insecurity.</p> <p>Households with children are defined as households with individuals who are either aged 15 or less (DHHDYKD=1), or aged 16 or 17 (DHHOKD=1) and who are the child, grandchild, child-in-law, niece or nephew of another household member. In order to determine household food security status, responses to each question are first coded as either "affirmative" or "negative". Some of this coding is obvious because the only response options are "yes" or "no". For questions with less obvious response categories, the procedure for coding is as follows: response categories such as "Often true", "Sometimes true", "Almost every month", "Some months but not every month" are coded as "affirmative" (i.e. coded equal to 1). Response categories such as "Never true", "Only 1 or 2 months" are coded as "negative" (i.e. coded equal to 0). In 2009, an error in the model was corrected. Please see the Canadian Community Health Survey Errata for more information.</p>
